Skills

- **Languages**: C++, JavaScript, C, Python, Java, Shell scripting
- **Frameworks**: HTML and CSS, NodeJS
- **Tools/Platforms**: AWS, MySQL, Git, Github, Gitlab, MongoDB, Kubernetes, Docker, Jenkins, Terraform
- **Soft Skills**: Problem-Solving, Growth Mindset, Team Player, Adaptability, Analytical Thinking

Projects

Zomato Clone – End-to-End DevOps Pipeline: Nov 2025

- Built a Zomato-like food delivery platform with a fully automated build, test, and deployment pipeline.
- Used Git, GitHub, Jenkins for CI/CD, Docker for containerization, Kubernetes for orchestration, and Terraform for infra automation.
- Reduced deployment time by ~70% and ensured stable, zero-downtime releases through automated rollouts.
  Tech: Git, GitHub, Jenkins, Docker, Kubernetes, Linux, CI/CD, Terraform

AI-Powered Task Manager – Full Stack Sept 2025

- Developed a full-stack task manager with AI-based smart suggestions for prioritizing and organizing tasks.
- Managed backend services with Node.js and Express, integrated MongoDB, and designed a responsive UI using HTML and CSS.
- Improved task organization efficiency by ~60% with real-time updates, authentication, and smooth CRUD operations.
  Tech: JavaScript, Node.js, Express.js, MongoDB, HTML, CSS

Event Reminder System – Java DSA + Swing Jul 2025

- Created a desktop-based event reminder system for scheduling and managing events efficiently.
- Implemented Java Swing UI with DSA concepts such as arrays, lists, queues, and file handling for data persistence.
- Reduced missed reminders by ~50% through reliable scheduling and persistent notifications.
  Tech: Java, Java Swing, OOP, DSA (Arrays, Lists, Queues), File Handling

Medical Appointment Website Dec 2023

- Designed a medical appointment booking website to simplify patient scheduling and management.
- Engineered a responsive interface using HTML and CSS with JavaScript-based form validation and dynamic sections.
- Enabled faster appointment booking, reducing scheduling time by ~30% through a simple and responsive interface.
  Tech: HTML, CSS, JavaScript

Training

Data Structure and Algorithm using Java Programming– Cipher School Jul 2025

- Gained strong understanding of core Data Structures and Algorithms, improving problem-solving and logical thinking skills.
- Practiced problem-solving with arrays, linked lists, stacks, queues, trees, graphs, and recursion.
- Strengthened Java fundamentals through hands-on coding exercises and real-time assignments.

Certificates

- Data Structure and Algorithm using Java Programming - Cipher School July 2025
- The Bits and Bytes of Computer Networking - Coursera Sept 2024
- Python Fundamentals for Beginners - Great Learning Dec 2023

Extra-Curricular Activities

- Led my team to victory in the Red Mirchi 20-Over Cricket Tournament.
- Contributed to a community development initiative promoting women's empowerment through NGO collaboration.

Education

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 7.53*** *Aug 2023 - Present*
- **Bradford International School** Patna, Bihar
  Intermediate; ***Percentage: 75%*** *Apr 2021 - Mar 2022*
- **Shree Sai International** Patna, Bihar
  Matriculation; ***Percentage: 87%*** *Apr 2019 - Mar 2020*
